Course of Study.

The peculiar location of the Institution seems to require particular attention to the following subjects, viz: Classical Learning—A systematic and elevated course of Female Education—Education of Teachers for Common Schools—Preparation of Young Men for Business.

CLASSICAL DEPARTMENT.

We regard the study of the Classics of the highest importance in the education of both sexes. The experience and observation of many years as a teacher, as well as the nearly unanimous testimony of those best qualified to judge, lead us to believe that no course of instruction can do so much in a given time towards disciplining the mind, and treasuring up useful knowledge to so great an extent, as a suitable course of instruction in the Classics. The Languages will be so taught, that whatever the attainments of the student, they shall be rendered as practical as possible.

LECTURES.

Spring Term—On Human Physiology, Mineralogy, Geology and Physical Geography.

Summer Term—On Botany.

Fall Term—On Chemistry, Comparative Physiology, and Teaching.

One, at least, of the foregoing subjects will occupy a full course of Lectures during each Term. The Lectures are delivered before

select classes, who are expected to take notes, and be prepared for examination on the subject of each preceding lecture.

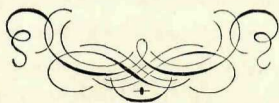

CABINET.

There is a Cabinet of specimens in Mineralogy and Geology, sufficient to illustrate the principles of these sciences. There is a pretty extensive Herbarium, and a well arranged collection in Conchology.

TEACHER'S CLASS.

Classes will be formed during the Spring and Fall Terms. Lectures, and such other exercises, will be introduced as shall best fit the teacher for the duties of the school room.

Students have access to the most valuable works on teaching which have been published in this country.

General Information.

INSTRUCTION.

The most approved methods of instruction and text books will be adopted. To discipline the mind and store it with useful knowledge; to kindle up a desire for learning, and induce studious habits; to render all proper instruction in regard to their physical being, and to elevate the moral affections, will receive their due share of attention.

Both Departments of the Institution have been divided into three classes, and, as far as practicable, a systematic course of study marked out. As the consequence, a manifest advancement has already been made in a more thorough course of instruction. Certificates will be given to all who have completed the course in either department.

TERMS.

The Academic year is divided into four terms, of eleven weeks each. Each Term will commence on the first Monday in September, December, March, and June, respectively, followed at the close of each term by a vacation of two weeks.

GOVERNMENT.

The Government of the School will be such as if possible, shall secure the implicit confidence of the student, without which no real improvement can be expected. A cheerful compliance with the regulations of the school, will always render the relation between teacher and pupil pleasant. Parents at a distance should in all cases consult the Principal by letter, or otherwise, in regard to their own wishes.

No Student can be retained who may refuse to comply with the regulations, or whose conduct may be injurious to the good morals of the school.

LOCATION.

The Academy is situated in the delightful village at Bethel Hill, and but a few rods from the Depot of the Atlantic and St. Lawrence Rail Road.

The Student will find everything that can be expected in a village to render his situation pleasant. The surrounding country is exceedingly romantic, presenting views of great interest to the lover of nature.
